

Dirt Moisture Trap

- They protect the pneumatic calibrator against the ingress of residues (oil, water, etc.) present in the process instruments connected to the PCON.
- These residues can affect the pressure control and damage the PCON, potentially voiding the warranty.

For FS version up to 40 bar

Model: SI-600-FS-S

- Order Code: **06.08.0134-00.**
- Ideal for FS version up to 25 bar.

Model: SI-600-FS-L

- Order Code: **06.08.0135-00.**
- Ideal for FS version from 30 to 40 bar.

For FS / RM version of 70 bar it has a reduced internal volume.

- It reduces the operating time of the internal compressor, increasing its lifespan.

Model: SI-1000-FS

- Order Code: **06.08.0103-00.**
- Ideal for FS version of 70 bar.

Model: SI-1000-RM

- Order Code: **06.08.0136-00.**
- Ideal for RM version up to 70 bar.

For large quantities of calibrations.

- Ideal for applications using external air supply, it has a larger internal volume.

Model: SI-600

- Order Code: **06.08.0090-00.**
- Ideal for RM version up to 40 bar.

Model: SI-3000

- Order Code: **06.08.0095-00.**
- Ideal for RM or FS version working with external air supply (has a large internal volume).
- For pressures up to 3000 psi (210 bar).
